

A black and white close-up portrait of a woman with her hair pulled back. She is looking directly at the camera with a slight smile. Her right hand is resting under her chin, with her fingers slightly curled. She is wearing a dark, possibly black, top. The background is dark and out of focus.

Pearl.

CUTERA®

# An evolutionary laser wavelength to renew the skin's surface.

The minimally invasive Pearl™ procedure by Cutera is bound to become a standard skin rejuvenation treatment for your practice. Pearl improves uneven skin texture, sun damage, and fine wrinkles after only 1 or 2 treatments, *and* has a low-risk profile with minimal recovery time. Best of all, your patients' skin will be left with a pearl-like glow.

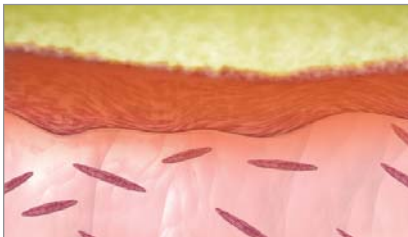

*"What's exciting about the Pearl is the ability to maximize patient outcomes and minimize their downtime. The Pearl uses a unique wavelength where you actually get the proper balance of tissue removal and thermal damage to the epidermis. And, it's a procedure that makes patients happy because they all see results in just 3-4 days after their treatment." -E. Victor Ross, MD*

To learn more about the Pearl Procedure, request your Positively Pearl DVD at [www.pearllaser.com](http://www.pearllaser.com)

## The Pearl Procedure Timeline

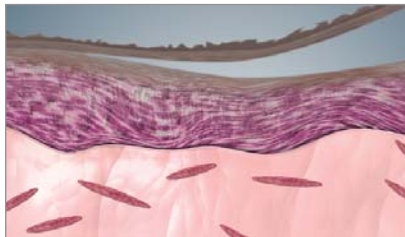

0-400ms

### Exclusive YSGG technology:

Pearl's 2790 nm wavelength uses pulses of light to ablate 10 to 30 microns of epidermis, vaporizing the most damaged tissue. Beneath, 20 to 60 microns of tissue are coagulated by the laser energy providing full epidermal turnover.

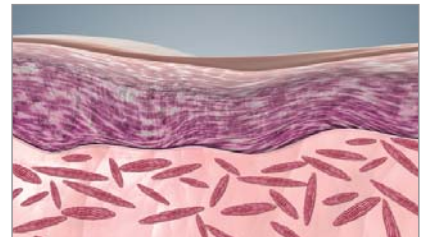

0-4 Days

### Nature takes its course:

Once the tissue is thermally coagulated, a natural protective dressing forms on the skin. This effect makes the healing comfortable and safe during the restorative process. On day 3 or 4, the natural dressing peels or sloughs off, leaving new, healthier and vibrant skin.

5-30 Days

### Collagen stimulation:

Residual heat in the upper dermis stimulates new collagen production. Over time, this results in improved skin elasticity and a fuller, smoother appearance. Pearl achieves all this in a 10-15 minute treatment with only 3-4 days of social downtime. The result is beautiful skin.
